

## Quick Facts About The Reltok Clear-Flo™ Nasal Airway

This unique airway, inserted during surgery, consists of two soft plastic tubes, one for each nasal passage. Air will pass just as it normally does through the nose en route to the lungs. The tubes are non-adherent; you will barely note their presence.

After surgery, to best facilitate air flow, it is important to flush or irrigate the tubes at home. We will demonstrate the use of it to you and your caregiver who picks you up after surgery. An illustrated **Home Care Instructions** card and supplies will be provided at that time.

On the appropriate post-operative day, the airway tubes will be removed. They do not stick to the nasal interior and slip out quite handily.

# Immediately After Nasal Surgery You Will Breathe Clearly

## Quick Facts

The Reltok Clear-Flo™ Nasal Airway allows patients to breathe immediately through the nose whether packed or unpacked following nasal and sinus surgeries.

- Patients no longer experience blocked nasal passages, ear popping, claustrophobia, and anxiety during recovery.
- Simple office removal.
- Topical anesthetic administered into nose makes removal quick and painless.
- Constructed from FDA-standard, latex-free, soft, medical grade silicone plastic.
- Developed by a veteran nasal surgeon and faculty member at UCLA.
- Supplied sterile with complete operating room and home care instructions.

## Patient Testimonials

“I am writing to you to let you know how much I appreciated the post-op breathing tube that was inserted for me after my nasal surgery. For me, the absolute worst thing about nasal surgery is the post-op packing. The breathing tubes made all the difference. What the tubes did do was essential—Great invention!

– Lauriann Wright

“I put off having nasal revision surgery for seven years because the nasal packing from my first surgery was such a bad experience. My surgeon showed me the alternative of using the Reltok Clear-Flo Nasal Airway. My mother was amazed to see me being mentally comfortable and looking relaxed compared to my first experience of wanting the packing taken out every minute. The AIRWAY is the only way to go!

– TLR

“I wanted to comment on the unbelievable results the Reltok Clear-Flo Nasal Airway provided. I had nasal surgery without the use of the AIRWAY and the improvement in my comfort and ability to breathe during my recovery was dramatic. I would highly recommend that anyone considering any type of nasal or sinus surgery could benefit from the use of the Reltok Clear-Flo Nasal Airway. PLEASE USE THEM.

– Colleen Kamens

“My experience with the Reltok Clear-Flo Nasal Airway was great. It was very easy to breathe. I would recommend it to a friend/family member.

– Orly Kashri

“For me, the absolute worst thing about nasal surgery is the post-op packing. During the recovery from my first three surgeries elsewhere, I took pain killers back to back until the packing was out. The Reltok Clear-Flo Nasal Airway used on me made all the difference. What the tubes did was essential - they took out the torture feeling element and made those first five days tolerable and even comfortable at times.

– Laurie Wilson

“While everything was in, I found it very helpful to be able to breathe out of one nostril versus not being able to breathe at all out of the other. If given the choice, I would opt for the Reltok Clear-Flo Nasal Airway.

– Don Zirlin

“Having the nasal tube in my right nostril only, I could definitely appreciate the ability to be able to breathe. I would definitely recommend the Reltok Clear-Flo Nasal Airway to anyone undergoing nasal surgery.

– Laura Meiojas

“The most amazing thing was that I could breathe after surgery!!! I had never experienced this with my other surgeries nor had I ever heard of it. The fact that I could breathe out of my nose because of these tiny tubes made recovery so much more comfortable and easy. All I can say is “WOW!”

– Georgia Mayfield
